To whomsoever it may concern

We are using fuel stick in Boilers as well as in generators at our factory for last 1 year.

We are very much happy with the result of the product Fuel Stick in Diesel. We are getting

Approximately 15% fuel reduction in boilers as well as in Generators.

We are very much surprise to see the boilers from inside at the time of passing, as they were very much clean from inside and there was no carbon deposition or particle inside.

Our down time in servicing and maintenance has come down drastically after using Fuel Stick.

We provide our 100% support to the product as your product is not only reducing the

Fuel consumption but also saving our down time as well as maintenance time and also reducing pollutants thereby making HSD as a clean fuel.

Regards

Milind Kanhe
