Queensville Sod Farm Gets Greener!

My name is Mark Fairty, and I am the owner/operator of Queensville Sod Farms Limited. I am continuing the family tradition of over 60 years of providing top quality nursery sod, grass seed and fertilizer for complete lawn maintenance. New this year is professional installation services headed up by my son, Gordon.

As an active member of the Nursery Sod Growers Association of Ontario, Queensville Sod Farms have over 600 acres of Nursery Sod at their main farm on Leslie Street in Queensville and proudly services York, Durham, Halton and the GTA.

Our fleet of vehicles includes Internationals, Western Star, Sterling and several Ford pickups ranging from 1999 to 2009 models. All diesel vehicles have been running on bio-diesel for three years now to aid in reducing emissions. I decided to take it a step further by introducing Fuel Stick Organic Fuel Conditioner to my entire fleet.

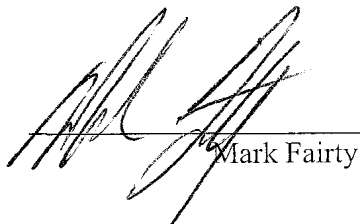

What initially impressed me was the reduction in fuel consumption of my 2008 diesel Ford pick-up. It went from 24 litres/100 km to 19 litres/100 km; a reduction of over 20%. My cost to treat the fuel is more than covered in my savings.

I have been treating the entire fleet of vehicles and equipment for two seasons now with an overall savings of 20% in fuel costs alone. Emissions are down and no fuel system repairs have been needed.

Queensville Sod Farm encourages you to join in saving not only money but your health and environment too! Please feel free to contact myself or my assistant Susan for authenticity of this endorsement, as well as to quantify the results of my use with this product.

Sincerely,

QUEENSVILLE SOD FARM LIMITED

Mark Fairty
